

European Union H2020 Call Engagement Policy

buildingSMART wishes to encourage and engage with any appropriate H2020 calls.

Our role and mission as a standards body dictates that we are open and behave in a neutral way toward any consortia which wishes to engage with buildingSMART.

Our strategy for engagement with consortia responding to a specific call is therefore as follows:

- buildingSMART International Ltd will support bidding consortia by providing information and guidance as to how to engage with our programs to socialise solutions and propose these as standards for adoption.
- Consortia should establish a buildingSMART liaison partner within their bid team. This may be either a buildingSMART Chapter or a buildingSMART International Ltd Member or the consortia can commit to become a member of buildingSMART International should they be successful.
- buildingSMART International will enter into confidentiality / non-disclosure agreements on a non-exclusive basis. We anticipate that liaison partners will engage with individual consortia on an exclusive basis.
- Consortia should note that all buildingSMART's activities are funded from work-in-kind, sponsorship or direct support from proponents and appropriate allowance should be made to support necessary activities within buildingSMART.
